

cleaning technology

without high pressure, water and chemicals

FEATURES

ADVANTAGES

Cleaning without water

- ✓ dry work (no soaking of masonry)
- ✓ usable at minus temperatures

Cleaning without chemicals

- ✓ no environmental regulations
- ✓ no expensive waste disposal

Cleaning without high pressure

- ✓ especially suitable and usable on sensitive and valuable surfaces

Cleaning in a cycle

- ✓ low consumption of blast media
- ✓ eco friendly
- ✓ high accident protection, since the system is only working when cycle is closed

Cleaning dust-free

- ✓ ideal for indoor usage and production areas

Cleaning with granulate

- ✓ reusing blast media (up to 100 times in a cycle)
- ✓ different blast media for optimal usage

Simple handling

- ✓ short introductory training
- ✓ quick set up
- ✓ connection to common power supply
- ✓ protective clothing not necessary

Eco-friendly

- ✓ eco-friendly and advanced working method
- ✓ easy disposal

Environmentally friendly

- ✓ low noise level (75db, like a common vacuum cleaner)
- ✓ ongoing business or customer operating during cleaning

Robust

- ✓ stainless, since machine is made of steel and plastic

Compact and light

- ✓ mobile use
- ✓ easy to transport
